A sample document

This document was written by hand for the docx-to-pdf test suite, under the project's Apache-2.0 licence. It has a heading, two paragraphs of plain text and a little **bold** and *italic* type.

The same text is kept in three formats, RTF, ODT and DOC, so that each one is converted to a PDF by the oracle and by the service, and the two answers are compared by page count, page sizes and text.
