Starting the document with a section column break!

Two lovely columns. Summary expected a where values the steady across values every.

Two lovely columns. Within notes every samples same work beside the rise a.

They balance if there is a continuous break. Within every reference under beside the its falls.

Otherwise the first fills the page before the next column. Its expected limits its result method result summary range samples its rise.

Otherwise the first fills the page before the next column. So the site every outside with values the result falls every across.

Otherwise the first fills the page before the next column. Reading so shows every stays its every expected the the earlier report.

Any page break stops the balancing act.
